```java
import java.lang.*;
import java.util.*;

class Qwe
{
public static void main(String arg[])
{
String str1="Mr. Shahrukh Khan";
      System.out.println("  1");
      System.out.println(str1.startsWith("Mr."));
       System.out.println("  2");
      System.out.println(str1.startsWith("Shah" , 4));
       System.out.println("  3");
      System.out.println(str1.endsWith("Khan"));
       System.out.println("  4");
      System.out.println(str1.charAt(4));

String str2="www.udemy.co.in";
      System.out.println("   5");
      System.out.println(str2.indexOf("."));
      System.out.println("  6");
      System.out.println(str2.indexOf(".",4));
      System.out.println("  7");
      System.out.println(str2.indexOf("udemy"));
      System.out.println("  8");
      System.out.println(str2.lastIndexOf("."));
}
}
